PROFESSIONAL SUMMARY

Software Engineering student at the Federal University of Technology, Akure (FUTA), currently in 400 level, with hands-on experience developing web applications and frontend interfaces using HTML, CSS, JavaScript, React, Git, and GitHub. Experienced in building and maintaining personal software projects involving search functionality, application interfaces, structured data, and responsive web experiences.

Currently expanding skills in mobile application development with React Native and Flutter. Also brings 4+ years of freelance experience in graphic design and digital content production, providing additional strengths in visual communication, attention to detail, client collaboration, and creative problem-solving.

Seeking a **Software Engineering / Frontend Development SIWES or Industrial Training opportunity** to contribute to real-world projects, gain professional engineering experience, and further develop technical skills within a professional development team.

EDUCATION

Federal University of Technology, Akure (FUTA) | *B.Tech, Software Engineering* | 2023–2028

- Current Level: 400 Level

Messiah High School — Akure, Ondo State | *Secondary School Education* | 2017–2023

- Served as Senior Prefect.
- Graduated as the Most Outstanding Student of the 2023 Set.

TECHNICAL SKILLS

Frontend Development: HTML, CSS, JavaScript, React

Mobile Development: React Native, Flutter (currently learning)

Development Tools: Git, GitHub, VS Code

Graphic Design: Canva, Adobe Photoshop

Video Editing: CapCut

Currently Learning: Adobe Illustrator, Adobe After Effects

PROJECTS

Living Stone Hymns | *Web/Mobile Application* | *Live & Actively Redeveloped*

Link: livingstonehymns.netlify.app

- Developed a digital hymn application designed to make hymn discovery and access easier.
- Implemented functionality for searching and navigating a large collection of hymns.
- Actively redeveloping the application with UI improvements, translations, and additional features.
- Maintains and updates the project through GitHub.
- Technologies: React, JavaScript, JSON, Git/GitHub

House-Finder | *Student Housing Platform* | *In Development*

- Designing and developing a platform intended to help students find off-campus accommodation.
- Planned features include property discovery, virtual tours, landlord-tenant communication, rent payments, and rent reminders.
- Applying software engineering principles to the system design and development process.

God's Own Creche Website | *Web Application* | *In Development*

- Developing a website for God's Own Creche to establish an online presence and provide accessible information about the institution.
- Working on website structure, user interface, and responsive frontend experience.

Travel Sense | *Travel Safety & Journey Planning Application* | *In Development*

- Developing an application focused on safer and more informed travel planning.

- Designed to support travel-route tracking and journey planning.
- Planned features include journey pricing, route information, safety-focused travel planning, and ride booking.
- Exploring how technology can improve travel awareness and passenger safety.

EXPERIENCE

The Church of the Living Stone International (COTLIST) | *Media / Creative Team Member* | 2+ Years

- Contributed to the church's digital media and visual communication activities.
- Created a digital hymn webapp (Living Stone Hymns) for the church and still in active development
- Created and edited visual content for church programmes, announcements, and online communication.
- Used Canva, Photoshop, and CapCut to produce graphics and video content.
- Collaborated with other media team members to deliver content for church activities and events.
- Developed practical experience in visual communication, content creation, and media production.

Freelance / Client Creative Work | *Graphic Design & Video Editing* | 4+ Years

- Completed multiple creative projects for clients involving graphic design and digital content.
- Created social media graphics, promotional designs, and edited video content.
- Used Canva, Photoshop, and CapCut to deliver client-focused creative work.
- Worked from client requirements and incorporated feedback to refine final designs.
- Developed practical experience working with creative briefs, client feedback, and digital content production.

SOFT SKILLS & STRENGTHS

Multidisciplinary Learning: Ability to learn and work across software development, design, media, and technology-related fields.

Pattern Recognition: Strong ability to identify patterns, relationships, and recurring structures when analyzing problems and information.

Analytical Thinking: Breaks complex problems into smaller components to identify practical solutions.

Adaptability: Comfortable learning new technologies, tools, and workflows.

Creative Problem Solving: Combines technical and creative thinking to approach problems from different perspectives.

Leadership & Collaboration: Experience leading and working with teams through school leadership and church media activities.

Attention to Detail: Focused on accuracy, visual quality, and continuous improvement.

PROFESSIONAL INTERESTS

• Cybersecurity • Military and Defense Technologies • UI/UX & Product Development • Artificial Intelligence & Emerging Technologies • Creative Technology

CAREER TARGET

Software Engineering Internship / Industrial Training — Seeking opportunities to apply software engineering and frontend development skills in a professional environment while contributing to real-world projects and continuing to develop technical expertise.
